Projects

Stylish Shoes Store | link – stylishshoesstore.netlify.app

- Designed and developed an e-commerce platform for shoes using React, Tailwind CSS, Express.js, and MongoDB.
- Implemented features such as user authentication, cart management, search functionality, payment integration, and dynamic listings pages.
- Managed application state effectively using Context API and Redux for a seamless shopping experience.

LifeStyle Blog | link – lifestylemag.vercel.app

- Built a modern and visually appealing blog web application using Next.js, Tailwind CSS, and MongoDB.
- Implemented key features including user authentication, blog favoriting, and dynamic blog pages.
- Utilized Redux for efficient state management, ensuring a seamless and responsive user experience.

The Quizzes | link – quiz-rishabh.vercel.app/

- Developed The Quizzes, a dynamic quiz web app built with React.js, offering customizable options such as number of questions, topics, difficulty level, question type, and time limits.
- Designed an interactive scorecard feature and a review screen displaying all questions with user answers and correct answers for detailed feedback.
- Ensured a smooth and responsive user experience by leveraging React.js for state management and efficient rendering.
